

[SYNTHETIC SAMPLE] Fictional record generated for the DELPHi prototype demo. Names, institutions, and statements are invented; the layout imitates a generic field-medical format. Not a real document and not derived from any real record.

[CONFERENCE REFERENCE] The meeting named above is a real, publicly announced scientific congress and is used here only as the setting of this fictional record. No session content, abstract, poster, or presented data from that meeting is reproduced or paraphrased; every person and conversation below is invented.

Congress Attendance Report — American Neurological Association Annual Meeting (ANA) 2023

Meeting period: September 2023 | Author: Marcus Obeng

Scope: unsolicited conversations held on-site. Session content and presented data are deliberately not reproduced here.

Conversation — Camila Larkspur, MD (Kestrel Comprehensive Epilepsy Clinic)

Introduced by a colleague from the same region and talked for a few minutes. Described how pediatric-to-adult transfers is triaged now compared with before. Spent some time on long-standing pts and how workup decisions get sequenced. Referenced a session summary from a colleague in passing.

Conversation — Gemma Brannigan, MD (Bayview Health Neurology)

A short exchange over coffee queue. Described a preference for slower titration in general, unrelated to any particular pt. Talked through newly referred pts in general terms, without any specific case.

Conversation — Eloise Thackeray, MD (Alder Point Neurology Associates)

We spoke standing near exhibit aisles, briefly. Referenced a session summary from a colleague in passing. The practice lost one of the nurse practitioners and has not backfilled, so clinic throughput looks better than last year.

Conversation — Lukas Stanhope, MD (Highmoor Health Neurology)

Stopped to talk on way out of a session block, with no agenda on either side. No specific request this time. Asked about safety and confirmed nothing to report. Described a preference for slower titration in general, unrelated to any particular pt.

Conversation — Rasmus Ashgrove, MD (Northgate Neurology Partners)

Caught between sessions in poster hall; convo was short and entirely unprompted. Referral patterns into this clinic have changed, and refractory group is bigger share than it was. Described how the pediatric-to-adult transfers is triaged now compared with before. Onboarding the clinic pharmacist is the current preoccupation here.

Conversation — Yolanda Reyes, MD (Copper Mesa Neurology)

We spoke standing near the exhibit aisles, briefly. Titration scheduling is handled by nursing staff, which practice finds workable. Noted that formulary questions has improved somewhat and that this is not specific to any one product. Asked whether I had seen review that circulated on service; I had not,

and offered nothing in return.

Follow-ups have been logged in the interaction system.
