

[SYNTHETIC SAMPLE] Fictional record generated for the DELPHi prototype demo. Names, institutions, and statements are invented; the layout imitates a generic field-medical format. Not a real document and not derived from any real record.

[CONFERENCE REFERENCE] The meeting named above is a real, publicly announced scientific congress and is used here only as the setting of this fictional record. No session content, abstract, poster, or presented data from that meeting is reproduced or paraphrased; every person and conversation below is invented.

Congress Attendance Report — American Neurological Association Annual Meeting (ANA) 2022

Meeting period: October 2022 | Author: Ravi Chandrasek

Scope: unsolicited conversations held on-site. Session content and presented data are deliberately not reproduced here.

Conversation — Hadley Wycliffe, MD (Northbrook Neurology Institute)

We spoke standing near the exhibit aisles, briefly. Described the practice as early in its experience here, with nothing to report yet. Benefit verification is the step that most often delays a start here. Mostly small talk about the program and the venue.

Conversation — Tobias Norrington, MD (Marbury Neurological Care Center)

Caught between sessions in the poster hall; the conversation was short and entirely unprompted. Asked whether I had seen a session summary from a colleague; I had not, and offered nothing in return. Spent some time on the refractory group and how workup decisions get sequenced.

Conversation — Adaeze Tavernier, MD (Juniper Flats Neurology Partners)

A short exchange over the coffee queue. Titration habits came up in general terms; no specifics were discussed and none were offered. Referenced a review that circulated on the service in passing.

Conversation — Saoirse Stanhope, MD (Northbrook Neurology Institute)

Caught between sessions in the poster hall; the conversation was short and entirely unprompted. Titration habits came up in general terms; no specifics were discussed and none were offered. Asked whether I would be at the meeting later this year.

Conversation — Gaspar Oakhurst, MD (Cedar Ridge Regional Epilepsy Program)

Introduced by a colleague from the same region and talked for a few minutes. Referral patterns into this clinic have changed, and the surgical workup list is a bigger share than it was. Spent some time on long-standing patients and how workup decisions get sequenced. Referenced a guideline update discussed at journal club in passing.

Conversation — Lachlan Beauchamp, MD (Northbrook Neurology Institute)

The conversation happened while waiting for a session room to clear. Titration habits came up in general terms; no specifics were discussed and none were offered. The travel schedule this year came up, and little else. Formulary placement was the only product-adjacent topic, and only in general terms.

Follow-ups have been logged in the interaction system.
