

[SYNTHETIC SAMPLE] Fictional record generated for the DELPHi prototype demo. Names, institutions, and statements are invented; the layout imitates a generic field-medical format. Not a real document and not derived from any real record.

[CONFERENCE REFERENCE] The meeting named above is a real, publicly announced scientific congress and is used here only as the setting of this fictional record. No session content, abstract, poster, or presented data from that meeting is reproduced or paraphrased; every person and conversation below is invented.

Congress Attendance Report — American Epilepsy Society Annual Meeting (AES) 2022

Meeting period: December 2022 | Author: Priya Menon

Scope: unsolicited conversations held on-site. Session content and presented data are deliberately not reproduced here.

Conversation — Ilse Lammermoor, MD (Kestrel Comprehensive Epilepsy Clinic)

We spoke standing near the exhibit aisles, briefly. This practice is still building familiarity with the product and had no clinical points to raise. Monitoring intervals during titration are set by clinic routine here rather than by protocol. Mostly small talk about the program and the venue.

Conversation — Alastair Whitmore, MD (Vantage Park Regional Epilepsy Program)

Introduced by a colleague from the same region and talked for a few minutes. Asked whether I had seen a review that circulated on the service; I had not, and offered nothing in return. Onboarding the clinic pharmacist is the current preoccupation here. Agreed to reconnect at the next visit; no materials requested.

Conversation — Caleb Munson, MD (Cedar Ridge Medical Group)

The conversation happened while waiting for a session room to clear. Talked through the surgical workup list in general terms, without any specific case. Asked whether I had seen a session summary from a colleague; I had not, and offered nothing in return. Described a preference for slower titration in general, unrelated to any particular patient.

Conversation — Yolanda Reyes, MD (Copper Mesa Neurology)

Approached me rather than the other way around, which is worth noting. Asked whether I would be at the meeting later this year. Described the practice as early in its experience here, with nothing to report yet.

Conversation — Lukas Stanhope, MD (Highmoor Health Neurology)

A hallway conversation during the afternoon break. Formulary placement was the only product-adjacent topic, and only in general terms. Compared notes on which sessions were worth the time. Onboarding a rotating resident is the current preoccupation here.

Conversation — Bram Eversholt, MD (Bayview Health Neurology)

Caught between sessions in the poster hall; the conversation was short and entirely unprompted. Left it at that, with a follow-up appointment to be scheduled. Referenced a case series someone forwarded in

passing.

Follow-ups have been logged in the interaction system.
