

[SYNTHETIC SAMPLE] Fictional record generated for the DELPHi prototype demo. Names, institutions, and statements are invented; the layout imitates a generic field-medical format. Not a real document and not derived from any real record.

[CONFERENCE REFERENCE] The meeting named above is a real, publicly announced scientific congress and is used here only as the setting of this fictional record. No session content, abstract, poster, or presented data from that meeting is reproduced or paraphrased; every person and conversation below is invented.

Congress Attendance Report — American Epilepsy Society Annual Meeting (AES) 2024

Meeting period: December 2024 | Author: Tom Alvarez

Scope: unsolicited conversations held on-site. Session content and presented data are deliberately not reproduced here.

Conversation — Fabian Marchetti, MD (Northbrook Neurology Institute)

A short exchange over the coffee queue. Talked through the refractory group in general terms, without any specific case. Titration habits came up in general terms; no specifics were discussed and none were offered.

Conversation — Josefina Dellacroix, MD (Sandhill Neuroscience Center)

A short exchange over the coffee queue. Asked about my travel schedule, since visits keep landing on busiest clinic days. Agreed to reconnect at call later this month; nothing that needed follow-up. Asked whether I would be at meeting later this year.

Conversation — Silvio Prendergast, MD (Silver Creek Medical Group)

Stopped to talk on the way out of a session block, with no agenda on either side. Referenced case series someone forwarded in passing. Asked whether I would be at meeting later this year. Described how long-standing pts is triaged now compared with before.

Conversation — Selin Danforth, MD (Willowmere Neuroscience Center)

We spoke standing near the exhibit aisles, briefly. No materials requested. Safety items asked about and confirmed none. The composition of the older half of the panel has shifted over the last year or two. The travel schedule this year came up, and little else.

Conversation — Ilse Norrington, MD (Ironwood Neurology Associates)

Approached me rather than other way around, which is worth noting. Talked through older half of panel in general terms, without any specific case. Referral patterns into this clinic have changed, and long-standing pts is bigger share than it was.

Conversation — Nikolai Barrowman, MD (Bluestem Comprehensive Epilepsy Clinic)

Stopped to talk on way out of a session block, with no agenda on either side. Asked whether I had seen guideline update discussed at journal club; I had not, and offered nothing in return. Mostly small talk about the program and the venue. Described how newly referred pts is triaged now compared with before.

Conversation — Bastian Dellacroix, MD (Bluestem Comprehensive Epilepsy Clinic)

Introduced by a colleague from the same region and talked for a few minutes. Described how refractory group is triaged now compared with before. Referenced a case series someone forwarded in passing. Noted that appeals process has improved somewhat and that this is not specific to any one product.

Conversation — Imani Quintrell, MD (Northgate Neurology Partners)

Introduced by a colleague from same region and talked for a few minutes. The practice lost the epilepsy fellow and has not backfilled, so routine f/u slots has stretched out. Talked through pediatric-to-adult transfers in general terms, without any specific case. Referenced session summary from colleague in passing.

Conversation — Hannah Beaufort, MD (Silver Peak Clinic)

Introduced by a colleague from the same region and talked for a few minutes. Mentioned a session summary from a colleague but did not raise any specific finding. Asked whether I would be at the meeting later this year.

Conversation — Eloise Quintrell, MD (Beacon Hill Neurology Associates)

A hallway convo during the afternoon break. Asked about my travel schedule, since visits keep landing on the busiest clinic days. Spent some time on newly referred pts and how workup decisions get sequenced. Referenced a guideline update discussed at journal club in passing.

Conversation — Arvind Calderwood, MD (Sandhill Neuroscience Center)

A short exchange over the coffee queue. Mostly small talk about the program and the venue. No materials requested. Safety items asked about and confirmed none.

Conversation — Lachlan Dunmore, MD (Sandhill Neuroscience Center)

A hallway convo during afternoon break. Asked whether I had seen a review that circulated on the service; I had not, and offered nothing in return. Titration habits came up in general terms; no specifics were discussed and none were offered. Mostly small talk about the program and the venue.

Follow-ups have been logged in the interaction system.
