

[SYNTHETIC SAMPLE] Fictional record generated for the DELPHi prototype demo. Names, institutions, and statements are invented; the layout imitates a generic field-medical format. Not a real document and not derived from any real record.

[CONFERENCE REFERENCE] The meeting named above is a real, publicly announced scientific congress and is used here only as the setting of this fictional record. No session content, abstract, poster, or presented data from that meeting is reproduced or paraphrased; every person and conversation below is invented.

Congress Attendance Report — American Academy of Neurology Annual Meeting (AAN) 2025

Meeting period: April 2025 | Author: Rachel Suh

Scope: unsolicited conversations held on-site. Session content and presented data are deliberately not reproduced here.

Conversation — Bastian Grierson, MD (Copperfield Neurology Institute)

Caught between sessions in the poster hall; the conversation was short and entirely unprompted. Described a preference for slower titration in general, unrelated to any particular patient. Benefit verification is the step that most often delays a start here. Asked about my travel schedule, since visits keep landing on the busiest clinic days.

Conversation — Silvio Fitzgibbon, MD (Thornfield Regional Epilepsy Program)

A short exchange over the coffee queue. Compared notes on which sessions were worth the time. Spent some time on the surgical workup list and how workup decisions get sequenced.

Conversation — Gaspar Oakhurst, MD (Cedar Ridge Regional Epilepsy Program)

The conversation happened while waiting for a session room to clear. Talked through newly referred patients in general terms, without any specific case. Described a preference for slower titration in general, unrelated to any particular patient. Spent some time on the pediatric-to-adult transfers and how workup decisions get sequenced.

Conversation — Mairead Eversholt, MD (Granite Bay Epilepsy Center)

The conversation happened while waiting for a session room to clear. Spent some time on the surgical workup list and how workup decisions get sequenced. Referenced a review that circulated on the service in passing. Described a preference for slower titration in general, unrelated to any particular patient.

Conversation — Adaeze Brannigan, MD (Foxglove Health Neurology)

Approached me rather than the other way around, which is worth noting. Agreed to reconnect at the next visit; no materials requested. Referenced a session summary from a colleague in passing. Titration habits came up in general terms; no specifics were discussed and none were offered.

Conversation — Yannick Ashgrove, MD (Granite Bay Epilepsy Center)

We spoke standing near the exhibit aisles, briefly. Closed there — no specific request. Spent some time on the refractory group and how workup decisions get sequenced.

Conversation — Nikolai Norrington, MD (Cedar Ridge Regional Epilepsy Program)

Introduced by a colleague from the same region and talked for a few minutes. Referral patterns into this clinic have changed, and the older half of the panel is a bigger share than it was. Mentioned a review that circulated on the service but did not raise any specific finding.

Conversation — Imani Grierson, MD (Foxglove Health Neurology)

Introduced by a colleague from the same region and talked for a few minutes. The travel schedule this year came up, and little else. Referenced a session summary from a colleague in passing.

Conversation — Fabian Marchetti, MD (Northbrook Neurology Institute)

Approached me rather than the other way around, which is worth noting. No product discussion this time. Asked about safety and confirmed nothing to report. Referenced a session summary from a colleague in passing. Mentioned a session summary from a colleague but did not raise any specific finding.

Conversation — Anouk Oakhurst, MD (Saltmarsh Neurological Care Center)

Introduced by a colleague from the same region and talked for a few minutes. Asked whether I would be at the meeting later this year. Mentioned a guideline update discussed at journal club but did not raise any specific finding. No product discussion. Safety items asked about and confirmed none.

Conversation — Darius Prendergast, MD (Quarry Hill Epilepsy Center)

Caught between sessions in the poster hall; the conversation was short and entirely unprompted. Mentioned a guideline update discussed at journal club but did not raise any specific finding. Described how the pediatric-to-adult transfers is triaged now compared with before. Described a preference for slower titration in general, unrelated to any particular patient.

Follow-ups have been logged in the interaction system.
